SUMMARY

Software Engineering student at African Leadership University with experience building web applications using JavaScript, React, Node.js, Express.js, Firebase, Java, and Python. Passionate about developing technology solutions that solve real-world problems and improve user experiences. Experienced in software development, project collaboration, and community leadership through academic, professional, and volunteer initiatives. Strong problem-solving, communication, teamwork, and adaptability skills.

EDUCATION

African Leadership University

Bachelor of Software Engineering January 2024 – July 2027 (Expected)

Groupe Scolaire Remera Rukoma

Mathematics, Physics, and Computer Science 2019 – 2022

EXPERIENCE

Co-Founder & Financial Manager December 2019 – Present

BESTIM (Build-up Empathy Serenity Tranquility Integrity Mentoring)

- Co-founded a community-based organization focused on mentoring and counseling support.
- Manage budgeting, financial planning, and resource allocation.
- Contributed to programs that have positively impacted more than 200 beneficiaries.
- Collaborate with team members to organize community outreach activities.

Member – Baobab Community 2024 – Present African Leadership University

- Active member of the Mastercard Foundation Baobab Network.
- Participate in networking, mentorship, collaboration, and professional development opportunities.
- Engage in knowledge-sharing initiatives and community activities.

PROJECTS

JoinIn – Event Management Platform

- Developed a web-based platform for event registration and participation management.
- Implemented attendee and volunteer registration workflows.
- Designed feedback collection and QR-code attendance tracking features.
- Applied MVC architecture using Node.js and Express.js.

PlotSure Connect – Land Listing Platform

- Developed a land listing platform focused on improving transparency and reducing land fraud.
- Implemented user authentication and listing management using Firebase Authentication and Firestore.
- Created features for verified property listings and customer inquiries.
- Designed the platform to support secure land transactions.

Personal Library Management System

- Built a book management application for tracking books, members, borrowing, and returns. • Applied object-oriented programming concepts including inheritance, encapsulation, and exception handling. • Integrated database operations for managing records and transactions.

React Mini Blog Application

- Developed a responsive blog application using React functional components.
- Implemented reusable UI components and dynamic content rendering.
- Applied modern frontend development practices to improve user experience.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, REST APIs

Databases & Cloud: Firebase Authentication, Firestore, MySQL

Tools & Technologies: Git, GitHub, VS Code, Microsoft Office Suite

Professional Skills: Problem Solving, Leadership, Teamwork, Communication, Time Management, Critical Thinking, Adaptability

Github Link: github.com/EmeranceU
